

Director, Facilities Operations

Position Summary:

The Director of Facilities Operations is responsible for directing facilities and maintenance operations of Hospital building(s) and property. The Director is also responsible for landscape and grounds. This position manages the preventative maintenance, proactive repair, and reactive maintenance issues as they occur using skilled trades, e.g., HVAC, plumbing, electrical, utilities; and manages the hiring, training and supervision of staff, professionals and management personnel. The Director of Facilities Operations manages a safe and efficient working environment, essential to the performance of the business. The Director will oversee construction work.

Qualifications/Specifications:

- **Knowledge and Skills:** Thorough knowledge of facilities management, maintenance, and construction. Thorough knowledge of HVAC, utilities and piped gas systems. Computer literate with excellent technical, organizational, interpersonal and written/verbal communications. Knowledge of all applicable industry specific regulatory standards and governing agencies, e.g., OSHA; EPA; DCBC; NFPA; JCAHO.
- **Education:** Four (4) year degree in Engineering, Mechanical Engineering, Construction Science, Electrical Engineering or related field, or an equivalent combination of education training and experience in skilled trades.
- **Experience:** Four (4) years of experience in facilities management including custodial operations, grounds and landscape operations and maintenance, engineering, maintenance, construction experience with related continuous education courses. Working knowledge of HVAC, utilities and piped gas systems. Computer literate with excellent technical, organizational, interpersonal and written/verbal communications. Minimum of three (3) years supervisory experience.
